MEMORANDUM FOR THE RECORD

SUBJECT: Telephone Call from Col. Honeywell

1. At 1340 EDT this date, Col. Honeywell called in reference to IDEA 0527 support for FLIP TOP operation.

2. His main question was about the tanker route. I requested that he ask for the tanker to arrive at the point and time specified. The route is immaterial so long as the tanker can file a clear flight plan.

3. Col. Honeywell then said that [] had asked for the route but that he (Col. Honeywell) would call him back on the telephone to see if the data as requested were sufficient.

4. Col. Honeywell then discussed the warning areas by designator Corpus Christi as a refuelling point, and the fact that the use of warning areas (W-228 and R-6301) were day areas and that would not bother us. He mentioned R-6303 as a 60000 foot limit area.

5. I asked that he authorize "Jack" to coordinate directly with [] so he said that that is no problem and he, Col. Honeywell, would ask [] to authorize "Thornton" to contact []

6. This conversation was monitored by [] DPD/SECUR.
